

# Estes Road & Hobbs Road Intersection Improvements

## Proposed Conditions

### Description:

Left turning lanes will be added to each leg of the intersection. New cantilever signal poles and signal heads will provide protected turning movements and pedestrian crossings. Curb & gutter will be installed along each side of both Estes Road and Hobbs Road. Sidewalk will extend from the current termination point up to Copeland Drive with a raised crosswalk across Hobbs Road. Underground stormwater infrastructure will direct flow to the existing channel at the Hobbs Road crossing. The project has been coordinated with local utility companies, NDOT Traffic, Metro Water Services, and other adjacent projects.

**Total Project Length:** 2,882 ft.

**Anticipated Construction Start:** Summer 2025

**Anticipated Closures:** Full intersection closure in summer 2025; lane closures following as needed

### CONSTRUCTION CHALLENGES:

- UTILITY RELOCATION
- SCHEDULE
- TRAFFIC CONTROL
- PROJECT COORDINATION
