Executive Committee's Proposed Downsizing of the Homelessness Planning Council

Current Homelessness Planning Council (HPC) Composition

As outlined in the establishing ordinance for the Homelessness Planning Council, the body is made up of 25 members, including:

- **14** members elected by the Continuum of Care General Membership
- **8** members appointed by the mayor
- **3** members of Metro Council appointed by the vice mayor (non-voting based on BL2024-582)

The establishing ordinance requires that five of the voting members have lived experience of homelessness.

NOTE: There are currently 23 sitting members, of which 20 have voting abilities. 2 seats are currently vacant, including 1 elected by the General Membership and 1 appointed by the mayor.

Proposed Homelessness Planning Council (HPC) Downsizing

The Homelessness Planning Council Executive Committee reviewed feedback from the General Membership, Chairs, and HPC members and proposed that the composition of the membership be downsized to include:

- **11** members elected by the Continuum of Care General Membership
- **4** members appointed by the mayor
- **2** members of Metro Council appointed by the vice mayor (non-voting)

This composition would include 17 total members, with 15 having voting abilities.

The Executive Committee did not land on a definitive portion of the HPC membership that should have lived experience.
