

Nashville Community Homelessness & Housing Data, July 2025

Data Source: The Nashville-Davidson County Homeless Management Information System (HMIS). HMIS is a *shared community database* that collects data on households experiencing homelessness and programs intended to end homelessness. HMIS includes data from **48 participating service providers** in Nashville; including emergency shelters, transitional housing, street outreach, supportive services, and permanent housing programs. The Office of Homeless Services is the HMIS Lead Agency responsible for administering the HMIS and associated reporting.

The data below fluctuate month to month based on varying levels of community participation in HMIS and street outreach coverage. Any changes from month to month may or may not reflect true changes in homelessness.

3,486 people experienced homelessness in Nashville in **July 2025**. These 3,486 people were in **2,739 households**; **256 families** (including 638 children) and **2,483 adult only households**. Over the past 12 months, **10,939 unique people** have experienced homelessness in Nashville.

Increased Data Collection: As of November 2024, HMIS includes data from the Nashville Rescue Mission for the first time. While our system and community adjusts to this improvement in data collection, the data from these programs will be separated from our regularly reported data. As we improve data quality and strengthen the connection between HMIS and the Nashville Rescue Mission, we expect to see these numbers increase.

Data from the Nashville Rescue Mission is currently under construction. Please bear with us as we work to ensure all data reported is complete and accurate.

Nashville Community Homelessness & Housing Data, July 2025

The numbers below reflect the month of **July**. The arrows represent increases or decreases since the month of **June**.

Of the people who experienced homelessness in Nashville in the month of **July**:
